A Tenure of Landholdings Act was passed, declaring that all property rights were transferred to the civil administration and that legally recognized deeds of title for existing and prospective holdings could be purchased at market rates for Terrans and in exchange for nominal fees for officially registered Chironian residents, a concession which was felt essential for palatability. Employment by Terran enterprises would enable the Chironians to earn the currency to pay for the deeds to their homes that the government now said it owned and was willing to sell back to them, but they had grounds for gratitude-it was said- in being exempt from paying the prices that newly arrived Terrans would have to raise mortgages to meet. At the same time, under an Aliens Admissions Act, Chironians from outside would be allowed entry to Phoenix only upon acquiring visas restricting their commercial activities to paying jobs or approved currency-based transactions, for which permits would be issued, or for noncommercial social purposes. Thus the Chironians living in or entering Phoenix would cease, in effect, to be Chironians, and the problem would be solved. aware of a melancholy in her that he couldn't bear to see. Bernard and Celia breathed sighs of relief as they recognized Colman's features beneath the watch-cap inside the helmet, dripping with perspiration but apparently unharmed. Column anchored himself to another part of the structure that Hanlon was on, unhitched his safety line and untangled it from the other one, and then helped Hanlon pull it in to produce another spacesuited figure, this time upside down and with a pudgy, woebegone face that was somehow managing to keep a thick pair of glasses wedged crookedly across its nose. femur shorter than the left, and some bone fusion in his right foot. It was time to begin mobilizing the potential allies he had been quietly sounding out and cultivating for the three years since the last decisions. He replaced the Korean porcelain carefully in its recess among the bookshelves and walked through the lounge to the patio, where Celia was sitting in a recliner with a portable compad on her lap, composing a note to one of her friends. Yet neither of this booted pair seems in the least interested in the crumpled currency. Still without. The Two Moons occupied one end of the basement and ground-floor levels of a centrally located confusion of buildings facing the maglev terminal complex across a deep and narrow court, and had a book arcade above, which turned into residential units higher up. It comprised one large bar below sidewalk level, where floor shows were staged most nights, and two smaller, quieter ones above. Kath suggested one of the smaller bars and Colman agreed, permitting himself for the first time the thought. that a pleasantly romantic interlude might develop, though why he should be so lucky was something he was far from comprehending. If it happened, he wasn't going to argue about it. Celia sat and looked at the boxes, and wondered what it was about the whole business that upset her. It wasn't so much the spectacle of Mrs. Crayford's mindless parading of an affluence that now meant nothing, she was sure, since she had known the woman for enough years to have expected as much. Surely it couldn't be because she herself had succumbed to the same temptation, for that had been a comparatively minor thing--a single, not very large, sculpture, and not one that had included any precious metals or rare stones. She turned her head to gaze at the piece again--she had placed it in the recess by the corner window--the heads of three children, two boys and a girl, of perhaps ten or twelve, staring upward as if at something terrifying but distant a threat perceived but not yet threatening. But as well as the apprehension in their eyes, the artist had captured a subtle suggestion of serenity and courage that was anything but childlike, and had combined it with the smoothness of the faces to yield a strange wistfulness that was both captivating and haunting. The piece was fifteen years old, the dealer h3 Franklin had told them, and had been made by one of the Founders. Celia suspected that the dealer may have been the artist, but he hadn't reacted to her oblique questions on the

subject. Were the expressions on those faces affecting her for some reason? Or did the artist's skill in working the grain around the highlights to simulate illumination from above cause Celia to feel that she had debased a true artistic accomplishment by allowing it to be included alongside the others as just another item to be snatched at greedily and gloated over?. If Preston Maddoc, alias Dr. Doom, was at home, his disinterest in his wife's extreme distress couldn't. "I don't like the idea of a limited military presence down there," Borftein said. "We're trusting the Chironians too much. I still say they could have strength that they're not showing yet. We could be exposing those civilians to all kinds of risks--terrorism, provocations. What if they get hit by surprise? I've seen it all before." CHAPTER EIGHTEEN. night-smothered valleys, out of the trees into a broad planted field, the motherless boy hurries. He follows. In the Political Science course at school, the Mayflower II's primary mission had been described as one of "preemptive liberation," which meant that because the Asiatics and the Europeans were the way they were, they would seize Chiron and convert it to their own corrupt ways if given the chance, and the Mayflower I1 therefore had two years to teach the Chironians how to protect themselves. There were other, more abstract reasons why it was so important for thee Chironians to be educated and enlightened, which Jay didn't fully understand, but which he accepted as being among the many mysteries that would doubtless reveal themselves in their own good time as part of the complicated business of growing up.. "It's happened," Hanlon told him. "Kalens is dead. We found him inside the house, shot six times. Whoever did it knew what they were doing." Colman shook his head. "There shouldn't be any need. Celia's hair is a lot shorter. There'll be fewer people around later.
